

QA Validation Report - Sprint 2

Executed Validation Areas

1. Authentication and RBAC

- ? Verified backend role gating on internal modules.
- ? Confirmed wholesaler-specific /orders/my behavior.

1. Inventory mutation correctness

- ? GRN confirm increases raw stock and writes movement records.
- ? Batch complete consumes raw stock and adds finished stock by batch.
- ? Dispatch reduces finished stock and creates DISPATCH_OUT movements.

1. Traceability and audit

- ? Dispatch allocations preserve product-batch relationship.
- ? Audit entries created for critical CRUD and status transitions.

Automated Test Coverage Used

- ? server/tests/fefo.test.ts
- ? server/tests/bom-consumption.test.ts
- ? server/tests/integration/flows.test.ts

Defects Found During Sprint

- ? Early mismatch in edge-case validation messaging between routes.
- ? Minor UI inconsistencies in status visibility and form defaults.

Disposition

- ? Critical defects: 0 open.
- ? High defects: 0 open.
- ? Medium defects: deferred usability refinements to Sprint 4.

Sprint 2 QA Sign-off

Core MVP functionality accepted for progression to deployment hardening.
