

Quality Plan - Sprint 4

Project: Factory Inventory & Production Management System (MVP) Role: Quality Manager
Sprint: 4 Version: 1.0

1. Sprint Goal

Reach release-grade stability (A+ target) without breaking core demo flow.

2. Quality Objectives

- ? Resolve production CORS and API routing blockers.
- ? Ensure build/test/lint gates pass from repo root.
- ? Close key UI gaps (batch completion and additional reports visibility).
- ? Align deployment/setup/user documents to implemented behavior.

3. Validation Checklist

- ? Server build and client build pass.
- ? Server and client tests pass.
- ? Lint passes across workspaces.
- ? Production preflight behavior verified via curl.
- ? Operational smoke flow validated end-to-end.

4. Non-Functional Checks

- ? Stable error handling and safe failure messaging.
- ? No sensitive env leakage in docs.
- ? Consistent deployment guidance for Vercel.

5. Sprint 4 Quality Outcome

Release quality approved with all blocking defects closed and documentation synchronized.
