

Coding Contribution - Risk Manager

Contribution Scope

Role contribution focused on reliability and risk-reduction implementation support, not core feature ownership.

Implemented/Supported Code Areas

- ? Reviewed and supported CORS hardening in server/src/app.ts (allowlist function, preflight handling, safe origin checks).
- ? Supported environment safety toggle addition in server/src/config/env.ts (ALLOWVERCELPREVIEWS).
- ? Supported safer runtime error handling conventions in server/src/middleware/errorHandler.ts.
- ? Assisted verification of nested API route handling with server/vercel.json during production risk closure.

Evidence-Based Role Fit

These changes align with Risk Manager responsibilities: reduce production incident probability and improve fault tolerance.

Team Coding Distribution (Agreed)

- ? Nisal Dulneth Wickramaarachchi (Start up manager): 62%
- ? NBUUB Balalla (Project manager): 10%
- ? KMDD Kulathunga (Scheduling manager): 8%
- ? HJMSM Jayasinghe (Quality manager): 11%
- ? Heshan Shalinda Koralagamage (Risk manager): 9%

The Risk Manager share remains supportive and below the primary implementation owner, while still showing direct coding contribution.
