

Coding Contribution - Project Manager

Contribution Scope

Small but direct coding support focused on integration alignment and deliverable-verification adjustments.

Implemented/Supported Code Areas

- ? Supported UI integration updates aligned with agreed sprint deliverables:
- ? client/src/pages/Reports.tsx (delivery-aligned report visibility)
- ? client/src/pages/Users.tsx (onboarding guidance alignment)
- ? Supported documentation-to-implementation consistency checks impacting config and release flow.
- ? Supported final regression walkthroughs and minor corrective edits in collaboration with startup manager.

Evidence-Based Role Fit

Project manager contribution remains implementation-supportive and traceability-focused, without taking over core development ownership.

Team Coding Distribution (Agreed)

- ? Nisal Dulneth Wickramaarachchi (Start up manager): 62%
- ? NBUUB Balalla (Project manager): 10%
- ? KMDD Kulathunga (Scheduling manager): 8%
- ? HJMSM Jayasinghe (Quality manager): 11%
- ? Heshan Shalinda Koralagamage (Risk manager): 9%

This distribution preserves the requirement that the startup manager contributes more than 50% of total coding work.
