

Coding Contribution - Start up Manager

Primary Implementation Ownership

This role carried the main technical implementation workload across backend, frontend, deployment runtime, and final hardening.

Major Code Contributions

Backend Core

- ? Express app bootstrap and middleware orchestration (server/src/app.ts).
- ? Auth/RBAC integration with Firebase Admin and Mongo user model.
- ? Core modules under server/src/modules/* (products, suppliers, wholesalers, GRN, BOM, batches, orders, dispatch, reports, audit).
- ? Inventory and traceability models, stock movement handling, and audit utilities.
- ? FEFO allocation and delivery note PDF generation support.

Frontend Core

- ? App layout and role-based route structure.
- ? Operational screens in client/src/pages/* for all MVP modules.
- ? Final sprint UI enhancements for batch completion, reporting, and onboarding hints.

Platform and Release

- ? Serverless adapter and deployment runtime files (server/api/[...path].ts, server/vercel.json, client/vercel.json).
- ? CORS hardening and route reliability fixes for production.
- ? Seed workflow and deployment/runbook alignment.

Team Coding Distribution (Agreed)

- ? Nisal Dulneth Wickramaarachchi (Start up manager): 62%
- ? NBUUB Balalla (Project manager): 10%
- ? KMDD Kulathunga (Scheduling manager): 8%
- ? HJMSM Jayasinghe (Quality manager): 11%
- ? Heshan Shalinda Koralagamage (Risk manager): 9%

This satisfies the requirement that the startup manager contributes more than 50% of total coding effort.
